DDI Chrono

NOTE TO: Helene Boatner
Director, OMPS

FROM : Deputy Director for Intelligence

SUBJECT: Production Monitoring Systems [redacted]

25X1

1. A common thread in most of the Office contributions to the ADDI's annual review preparatory to preparing Office Directors' PARs has been dissatisfaction with the production monitoring systems -- specifically, that the burden of supporting several of these is too great, that DIPMIS does not work properly, and that ~~that~~ these different systems are redundant.

[redacted] 25X1

2. Please give me a report on the status of the production monitoring systems, whether there is redundancy, and when the problems with DIPMIS can be worked out so that we have one workable monitoring system that provides all the information required and yet imposes only a limited burden on the offices.

[redacted] 25X1
